

# Teodor Chirileanu

Senior .NET Backend Developer · Banking & Legacy Modernization

### Abstract

8+ years in C#/.NET development across banking, payments and enterprise systems.

### About

I work in established codebases, tracing business rules and modernizing services through controlled changes. At **ING Bank, Société Générale and American Express**, I worked with Visual Basic, WCF and SSIS across banking runtimes, liquidity reporting and payment products. Recent projects add APIs and event-driven integration.

## Skills

- Legacy & modernization:** C#, .NET Framework, Visual Basic, WCF, IIS, ASP.NET, WebForms, WPF, SSIS, stored procedures, n-tier applications.
- Backend & integration:** .NET 10, ASP.NET Core, REST APIs, SQL Server, Dapper, Entity Framework, Redis, Kafka, Azure Service Bus, Event Grid; Oracle (academic).
- Testing & delivery:** xUnit, Moq, integration testing, Playwright, PowerShell, Azure DevOps, GitHub workflows, Docker, Kubernetes, Terraform, Bicep.
- Observability & tooling:** OpenTelemetry, Application Insights, Grafana; AI-assisted development with code review and regression tests.

## What do others say about me?

“Teodor is a phenomenal .NET Developer who consistently delivered robust, high-quality code.”

Karni Singh Solanki, Architect at Deloitte

## Selected Experience

Selected .NET developer engagements, ordered by relevance.

### ING Bank · Romania

04/2023 - 09/2024

BPM Core banking platform  
C#, Visual Basic, WCF, n-tier architecture, Redis, Azure DevOps

Maintained the C#/Visual Basic runtime supporting lending, business banking and card issuing within an established n-tier architecture.  
Migrated in-memory sessions to Redis, extended dependency health checks and led .NET 8 upgrades across enterprise applications.

### American Express · US

03/2023 - 07/2024

Legacy payment products  
C#, Visual Basic, WCF, Blazor, Playwright, PowerShell, Cake

Maintained and modernized legacy payment products; extracted and documented EMV chip-card logic from existing code.  
Built a Playwright testing framework, developed the NGS certification tool in Blazor and automated build, packaging and deployment.

### Société Générale · France

06/2018 - 01/2019

Liquidity reporting  
C#, SQL, SSIS, ADO.NET, PowerShell, TeamCity

Extended an existing liquidity-reporting system with Basel III metrics. Optimized SSIS scripts, built an XML integration parser and upgraded the TeamCity delivery pipeline.

### RTGS.global · UK

03/2026 - 06/2026

Real-time settlement  
C#, .NET 8, Durable Functions, Service Bus, SQL, xUnit, OpenTelemetry

Built an immutable operations audit service with durable message delivery and dead-letter handling.  
Hardened settlement workflows with SQL retries, deadlock fixes and conflicting-state checks; added domain-level tracing.

### CFP Energy · UK

03/2025 - 10/2025

Carbon and energy trading  
C#, .NET microservices, Kafka, SignalR

Developed backend microservices for carbon and energy trading. Integrated Kafka and SignalR to support real-time operations across the trading platform.

### EPS · Lithuania

02/2025 - 06/2025

Card payments  
C#, ASP.NET, SQL, tSQLt, GitLab, TeamCity

Consolidated client databases and moved business logic from stored procedures into maintainable C#. Developed insurance-discount rules and SQL maintenance procedures for a live payments platform.

### Deloitte · US

02/2025 - 12/2025

Enterprise integration  
ASP.NET Core, Service Bus, Event Hub, Azure SQL, APIM

Extended integration APIs for cross-domain master-data synchronization. Added broken-message resending and poison-message handling; optimized SQL partitioning and expanded integration-test coverage.
